Website & Digital Solutions Development Proposal

This proposal highlights our expertise in delivering modern websites and digital solutions. We combine design, technology, and innovation to create scalable systems that improve efficiency and user experience.

SCOPE OF WORK

Website Development Services

- Website design and layout
- Pages (5–15 pages)
- Mobile responsiveness
- Contact form integration
- Basic SEO setup
- Performance optimization
- Domain setup guidance
- Hosting setup guidance

AI & Automation Solutions

- AI chatbot (customer support & FAQs)
- AI agent (task automation & workflows)
- Intelligent data processing and insights

- Personalized AI user experience

Backend & System Infrastructure

- Cloud database integration
- User authentication system (login/signup)
- API integration (per integration)
- Scalable system architecture

Mobile & App Development

- Progressive Web Application (PWA)
- Mobile-ready system optimization
- Full mobile application development
- Backend system development

E-Commerce Development

- E-commerce system (full implementation)
- Product listings and categories
- Shopping cart and checkout
- Order management system
- Payment integration
- Customer accounts

- Sales analytics and reporting

- Inventory management

Dashboard & Analytics Systems

- Dashboard system (full implementation)
- Admin dashboard
- User activity tracking
- Reports and analytics visualization
- Role-based access control
- Real-time data updates

Management Systems

- Management system (full implementation)
- User and role management
- Data entry and tracking
- Automated workflows
- Report generation
- Notifications and alerts

Real Estate Systems

- Real estate & property management system (full implementation)
- Property listings
- Advanced search and filtering
- Property detail pages

- Agent/owner accounts
- Booking and inquiry system
- Property management dashboard
- Map and location integration

SaaS Platform Development

- SaaS platform development (full system)
- Multi-user system
- Subscription and billing system
- Scalable cloud infrastructure
- Data isolation per user/organization
- API-based architecture
- Continuous updates and maintenance

Advanced AI Systems

- AI agent system (full implementation)
- AI assistant (chat-based interaction)
- Automated decision-making workflows
- Task automation system
- Intelligent recommendation system

Integrations & External Services

- API integrations (external systems)

- Payment gateway integration
- SMS and email notification systems

PRICING BREAKDOWN

BASIC WEBSITE PACKAGE

Time Frame: 1 Week

Included Services:

- Website Design & Development
- Mobile Responsiveness
- Contact Form Integration
- Basic SEO Setup

Optional Add-ons:

- Domain Setup
- Hosting Setup
- Maintenance (Monthly)

INTERMEDIATE WEBSITE + SYSTEM

Time Frame: 2–3 Weeks

Included Services:

- Website Design & Development
- Admin Dashboard
- Cloud Database Integration
- User Authentication System

- AI Chatbot
- API Integration

Setup Services:

- Domain Setup
- Hosting Setup

Optional Add-ons:

- Maintenance (Monthly)

ADVANCED SYSTEM (AI + SaaS PLATFORM)

Time Frame: 4–8 Weeks

Included Services:

- Full Website / Web Application Development
- Dashboard System
- SaaS Platform Development

- AI Agent System
- Cloud Database & API Development
- Payment Integration
- Mobile Application (Basic Version)

Setup Services:

- Domain Setup
- Hosting Setup

Optional Add-ons:

- Maintenance (Monthly)

Website & Digital Development Services Pricing

Service	Description	Price (RWF)
Website design and layout	Custom design of website interface, layout structure, and visual appearance	100,000 – 300,000

Order management system	Management of customer orders	200,000
Payment integration	Integration with payment gateways	150,000
Customer accounts	Customer login and profile management	120,000
Sales analytics and reporting	Sales tracking and reporting dashboard	150,000

Inventory management	Product stock tracking system	200,000

Dashboard & Analytics Systems

Service	Description	Price (RWF)
Dashboard system (full implementation)	Complete dashboard with analytics and system management	500,000 – 900,000
Admin dashboard	Administrative control panel	200,000
User activity tracking	Tracking user behavior and activity	150,000
Reports and analytics visualization	Data charts and analytics dashboards	200,000
Role-based access control	Permission system for different users	150,000
Real-time data updates	Live updates for system data	200,000

Business Management Systems

Service	Description	Price (RWF)
Management system (full implementation)	Complete business management platform	500,000 – 900,000
User and role management	Managing users and permissions	150,000
Data entry and tracking	Systems for recording and tracking data	150,000
Automated workflows	Automation of business processes	250,000
Report generation	System-generated reports	150,000
Notifications and alerts	System alerts and notifications	120,000

Real Estate Platform Development

Service	Description	Price (RWF)
Real estate platform (full implementation)	Complete property listing and management system	900,000 – 1,500,000
Property listings	Listing houses, land, rentals	200,000
Advanced search and filtering	Property filtering by location, price, type	150,000
Property detail pages	Individual property description pages	150,000
Agent or owner accounts	Accounts for property agents or owners	150,000
Booking and inquiry system	Property booking and inquiry forms	200,000
Property management dashboard	Dashboard to manage properties	250,000
Map and location integration	Map integration for property locations	150,000

SaaS Platform Development

Service	Description	Price (RWF)
SaaS platform development (full system)	Complete Software-as-a-Service platform	1,000,000 – 2,000,000
Multi-user system	Multiple users with role-based access	300,000
Subscription and billing system	Recurring subscription management	250,000
Scalable cloud infrastructure	Infrastructure for scaling applications	300,000
Data isolation per user/organization	Secure separation of customer data	250,000
API-based architecture	Backend APIs for system integrations	250,000
Continuous updates and maintenance setup	System update and maintenance infrastructure	150,000

Advanced AI Systems

Service	Description	Price (RWF)
AI agent system (full implementation)	Complete AI automation system	800,000 – 1,500,000
AI assistant	Chat-based AI assistant	200,000
Automated decision workflows	AI-driven decision automation	300,000
Task automation system	Automated system operations	300,000
Intelligent recommendation system	AI recommendation engine	250,000

Integrations & External Services

Service	Description	Price (RWF)
API integrations	Integration with third-party systems	100,000 – 300,000

Payment gateway integration	Integration with payment providers	150,000
SMS and email notification systems	Automated messaging and notifications	100,000

PAYMENT TERMS

50% deposit before project starts
50% after project completion

For large projects:

40% before start

30% mid-development

30% after completion

Payment method: Mobile Money / Bank Transfer / Cash
